J&M Products is dedicated to the manufacture and marketing of high-quality products and services. Through leadership, innovation and continuous improvement we are able to achieve the highest level of customer satisfaction. Our AS9100/ISO9001 approved quality management system applies to all aspects of the company. Our goal is to deliver defect-free products on time at the most competitive price possible.

At J&M response time is a critical part of total customer satisfaction. We maintain a large inventory of finished parts ready for immediate shipment. Delivery of large quantities can be made to coincide with your critical production schedules.

Requests for quotes are handled in the same prompt manner. On our standard product line, pricing and delivery information can usually be given at the time of your request. Whether it is emailed, faxed or sent through our website, all quotations receive the same prompt attention.

(SABRe compliant)

FAA PMA for many parts

Line Support Clamps & Brackets

J&M Products Line Support Clamps and Brackets are selected by major aerospace, transportation and industrial equipment manufacturers for use in widely varying applications including exposure to hydraulic, fuel, pneumatic and electrical systems. Line clamps are available with or without cushion materials; clamps with cushion materials are typically utilized for vibration intense conditions.

J&M Products utilize a wide variety of specialized elastomer cushion materials for use in extreme environments, such as exposure to fuel and hydraulic fluids with temperature fluctuations from 500°F. to -20°F

Wire Harness Manufacturing

J&M Products manufactures a variety of wire harnesses serving a broad range of customers including class 8 trucks, aircraft systems, marine, medical, vehicle accessories, and utility body manufacturers.

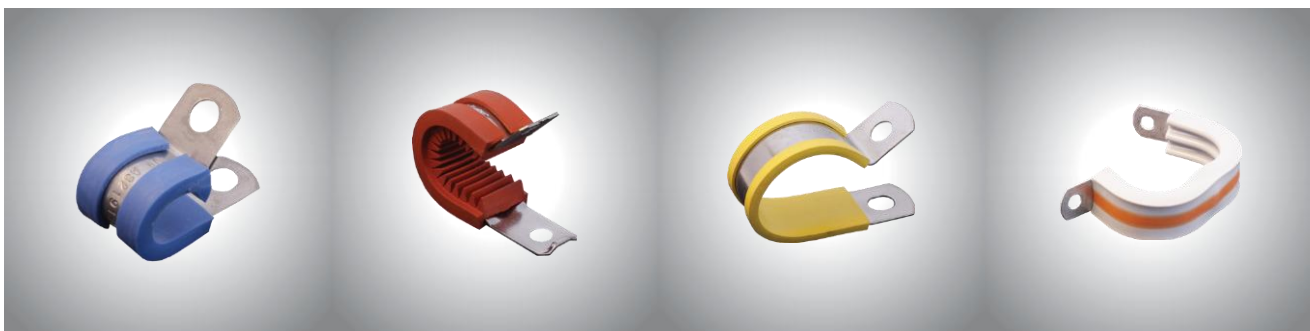

Wire harnesses are highly customized to the application per customer specifications; J&M can provide expert assistance during the prototyping and short run phase, ahead of production volumes.

Utilizing efficient manufacturing techniques, including in-house tooling capabilities, injection molding, and the latest in wire cutting, braiding, marking and terminating equipment, J&M provides high quality harness solutions with minimal lead-times.

Customer Satisfaction

Customer Satisfaction is our goal. For over 50 years J&M has provided a superior level of product performance with courteous and efficient customer service. We hope to develop and nurture a long-term relationship with each of our customers. We are not satisfied until our customers are satisfied. Every time.

The Quality Policy of J&M Products, Inc. is to proactively serve and satisfy our customers by improving the cost and quality of our products, by building a team of people who are quality and service oriented.
